

March 20, 2006

To Whom It May Concern:

Products manufactured by Innovative Paper Technologies, LLC (IPT, LLC) were tested for heavy metal content and were found to contain minimal amounts of lead, chromium, mercury, and cadmium, as these materials occur naturally in the clay used in the manufacture of IPT, LLC products. However, these amounts are below the minimum acceptable levels.

No Polybrominated biphenyls (PBBs) or Polybrominated diphenyl ethers (PBDEs) are used in the manufacture of IPT, LLC products, and according to the Material Safety Data Sheets (MSDS) of our suppliers, these materials are not present in the raw materials IPT, LLC uses.

| Materials Designated by RoHS           | Tested | Max. Allowable | TufQUIN <sup>®</sup> 5 mil | CeQUIN <sup>®</sup> I 10 mil |
|--|--------|----------------|----------------------------|------------------------------|
| Cadmium and compounds                  | Y      | 10 ppm         | .067 ppm                   | .196 ppm                     |
| Lead and compounds                     | Y      | 50 ppm         | .888 ppm                   | 5.0 ppm                      |
| Chromium Hexavalent (VI)               | Y      | 50 ppm         | .015 ppm                   | .010 ppm                     |
| Mercury and compounds                  | Y      | 50 ppm         | .035 ppm                   | .045 ppm                     |
| Polybrominated biphenyls (PBBs)        | N      | 50 ppm         | N.C.                       | N.C.                         |
| Polybrominated diphenyl ethers (PBDEs) | N      | 50 ppm         | N.C.                       | N.C.                         |

N.C. = Not Containing

Cadmium and lead were determined by atomic absorption flame spectroscopy.

Mercury was determined by the cold vapor method.

Chromium (VI) was determined by the diphenylcarbazone visible spectroscopy method.

To the best of our knowledge, IPT, LLC is in compliance with EU Directives 2002/95/CE and 2003/11/CE.
